Place: Chennai

Yours Truly

(SIVANESAN. D)

1) Why you are a good fit for this job & firm?

As I am a fresher I don't have practical achievements and past experience but I really want to practically explore and deliver my potential by giving my maximum performance to the company. I am a loyal and hardworking one from the early times in my school and colleges. I am one of the sets of people who always complete the task and assignment on time. For the above qualities, I will fit the position.

I am a fast learner so learning new technologies will be easier and adapting to them can improve my ability to cope up with the changing software world. New technologies are released every new day. I frequently update myself on the new technologies to the market. So, I feel that I would be a perfect fit for the software world and the position.

I feel that I should be hired by you given my good academic background along with the skills and knowledge the company is looking for.

I have good knowledge and the attitude to excel. If I get a chance, I will surely work towards building my expertise, in which would prove beneficial for me as well as your company.

I have more interest in learning new things and technologies and getting more new experience in real-world problems. Software is the firm where involves in all other departments use any kind of software so by working in software firm makes as work in all the departments in the real world. So I feel that due to my interest I feel I am the best fit for the job.

2) Describe why this job is a good fit for you?

Software career is my choice of career because the field is so broad and has a variety of roles related to both computer applications and systems. This means to work in the area or areas that interest me most. Software job is incredibly broad to work with we can work in multiple aspects of the project development cycle.

I like to work as a team. Team work plays an important role in creating software services and products. Another important area where my interest is in Troubleshooting where this job also serves my interest.

This is the job where I can grow along with speed of world growth without lagging at the past. These are the reasons I think I fit in the job.
